

LEED CI Credit Summary

Shift Levels™ Tables

Design for Environment Protocol are developed in accordance to Design for Environment (DfE) protocol as part of our organization commitment in minimizing the impact of each of our products on the environment. Our products use materials that are safe for human and ecological health, demonstrate very low emission levels and contain high recycled and recyclable contents. We design our products to facilitate change and reusability and are easy to disassemble and separate for responsible end of life management. We integrate carbon reduction strategies in product design, supply chain, manufacturing, packaging and transportation so that our products have lower carbon footprints.

Potential Credit Areas

MR Credit 2 Construction Waste Management

MR Credit 3.2 Resource Reuse

MR Credit 4 Recycled Content

MR Credit 5 Regional Materials

MR Credit 7 Certified Wood

IEQ Credit 4.5 Low Emitting Materials

IEQ Credit 8.1, 8.2 Daylight and Views

ID Credit 1 Innovation in Design

Material and Resources

	Construction Waste Management—Divert 50% from landfill	Credits
Credit 2	Returnable and Recyclable Packaging—Shift Levels packing materials include corrugated cardboard and expanded polystyrene bag. These materials are recyclable in many markets, which can reduce landfill disposal.	1 point
	Construction Waste Management—Divert 75% from landfill	
	Returnable and Recyclable Packaging— Shift Levels packing materials include corrugated cardboard, molded pulp, and expanded polystyrene bag. These materials are recyclable in many markets, which can reduce landfill disposal.	1 point

Resource Reuse—30% furniture and furnishings

Credit 3.2 Reuse— Shift Levels is designed for durability with a 12-year warranty and can be reused on many building projects. The simple table component construction also makes it easy to reconfigure Shift Levels for reuse. LEED credits may be achieved when reusing or purchasing used materials on a project. 1 point

Recycled Content—24% (postconsumer + 1/2 pre-consumer)

Credit 4 Shift Levels may contribute to this credit as a typical workstation contains 24% recycled content (post consumer plus 1/2 pre-consumer). Shift Levels contains 2% post consumer recycled content and 44% pre-consumer recycled content. 2 points

Regional Materials—20% manufactured regionally

Credit 5 Shift Levels may contribute to this credit depending on the location of the project. Shift Levels Tables are made as close to the project location as possible. 1 point

Indoor Environmental Quality

Low-Emitting Materials—Systems furniture and seating

Credit 4.5 Shift Levels meets the requirements of BIFMA X7.1 – 2011, R2016 and ANSI BIFMA e.3-2019. 1 point

Daylight and Views—Daylight for 75% --90%of spaces

Credit 8.1 Shift Levels may contribute to this credit through use of transparent materials and low furniture heights, allowing daylight to reach building occupants. 1 -4 points

Daylight and Views—Views for 90% of seated spaces

Credit 8.2 Shift Levels may contribute to this credit through use of transparent materials and low furniture heights, allowing outdoor views to reach building occupants. 1 point

Innovation in Design Process

Innovation in Design

Credit 1 LEED Innovation Credits can be achieved when a project exceeds the criteria by twice the base requirements of the credit or, in the case of multi-tiered credits, the next tier. 1 point
