

Rohde™ Easy Chair

Herman Miller's legacy of modern design can be traced back nearly a century to when Gilbert Rohde became the company's first design director in 1932. His designs helped set Herman Miller on its modernist course, with a focus on the people using them: "The most interesting thing in the home is the people who live there and I'm designing for them," he told founder D.J. De Pree during their providential first meeting. One of his last designs was the enveloping Rohde Easy Chair, expertly upholstered with tufts running across the entire seat and back in a diamond pattern.
